

# Course Assessment

---

***I am*** Anil Gattani residing at Mumbai . I have done my Civil Engineering and am practising as structural consultant since last three decades.

***I have*** been doing this course in Vedic Astrology since June , 2011. I do feel that it will continue a year for me still . The main advantage of the course is that Guruji has designed it in such a way that one is at a liberty to do the course at one's own pace.

***I have*** come across many people doing various courses. All those courses finishes within 6 months to 2 years and on finishing it one becomes more confused.

***The detail*** in which this course is being dealt is amazing and I can compare this to post graduation level. Guruji encourages interaction

and he clears all doubts and he is frank enough if astrologically explanation is wanting.

***This course*** is being designed in the US format. By this I mean steps are well defined , clear and one reaches to conclusion using basics while other vedic courses are designed to get you more confused. There are more than 300 yogas in VA and one is perplexed with the complexity. But Guruji here have kept us free of yogas and still the inferences of those can be drawn.

***This course*** sincerely is for those who have passion for learning. Course is amazingly simple but also meticulously detailed one.

***The best*** part of the course is that Guruji is highly spiritual and the way he deals with the chart is awesome. He becomes life coach for the person. Just to be with the course and HIM is like a living discourse we go through. How amazingly we transform, we are not aware. Guruji is compassionate, learned , disciplined , meticulous and have highly great command over the

language. I have in my life never come across a person, even if he has taken English literature, with such a high command of language.

***You all*** must be feeling that I am not describing the course but only praising Guruji. It is because it is said that COURSE IS ALWAYS AS GOOD AS THE ONE WHO TEACHES IT.

***The pain*** he takes in preparing the lesson, the Sutras he emphasizes, the presentation he does is beyond imagination and comparison.

***I am*** enjoying the process of learning immensely and shall always remain indebted to him for my evolverment.

***TAT TWAM ASI***
