

Dr. Sonera Jhaveri commenced the Course in Vedic Astrology in June 2015.

**Sonera Jhaveri, M.Sc., M.Sc., M.A. PhD** is an integral psycho-therapist who has been trained in San Francisco, California in body-centered, existential phenomenological, transpersonal, psychodynamic, cognitive- behavioral and dialectical behavioral therapy. She includes mindfulness practice, yoga, somatic awareness, dream work, art therapy and ecotherapy in her therapeutic repertoire. Her orientation is towards facilitating the harmonization of the multi-dimensional facets of an individual and integration of mind, body, soul and spirit. She has specialized in working with generalized anxiety disorders, depression and mood disorders, anger management, stress reduction, issues of low self esteem, eating disorders, marital discord, chemical dependency and addictions. She works within the ambit of health psychology and does therapeutic work with individuals enduring cancer, autoimmune diseases, terminal illnesses, kidney dysfunction, post natal depression and infertility. Currently, she has a private practice in Mumbai, India and is a consultant psychotherapist to Dr Balabhai Nanavati Hospital. Sonera also works with corporate banks and institutions such as Citibank and other privately owned businesses in the capacity of a stress and wellness coach.

London School of Economics, London UK

**B. A. Social Anthropology and Law (September 1999 –July 2001)**  
The School of Oriental and African Studies, London, UK

## **GRADUATE FIELDWORK AND RESEARCH PROJECTS**

### **Fieldwork for Doctoral Work in East- West Psychology**

**California Institute of Integral Studies, (September 2009- 2013)**

**Research Topic** – Unconscious Ecological Alienation and its impact on the Psychesoma. Although there have been studies on the nocuous effects caused by human destruction of nature and the oppression of the man-made environment, there is scarce mention of the subliminal dimensions of this ecological alienation, or the dissociation or lack of self-reflexivity regarding one's embodied responses to the surrounding world. This inquiry, then, seeks to explore the dissonance between documented psycho-physiological responses and psycho-emotional disconnection. It aims to be a movement amidst the registers of the pre-reflective and reflective; conscious and unconscious.

**Methodology** - The study is of mixed method design and will be conducted in Mumbai, India. Data gathering will occur by recording psycho-physiological responses to experimental stimuli consisting of randomized images of normalized ecological destruction with the aid of physiological monitoring, and through semi-structured interviews using the hermeneutic-phenomenological method.

### **Fieldwork for Doctoral Proposal in Medical Anthropology**

**University College London, (September 2004-August 2005)**

**Research Topic** – The Cross cultural implications of healing with Ayahuasca in Post Modern Peru. Observation of Ayahuasqueros healing clients with diverse psycho-physical problems such as depression; trauma; cocaine-alcohol addictions; cancer. Focus was on indigenous and new age constructions on health and illness and the bioenergetics of the bodymind.

**Methodology** – participant observation; phenomenological; narrative

### **Fieldwork and Research for M.Sc dissertation in Medical Anthropology**

**University College London, (June- August 2003)**

**Research Topic** - The therapeutic efficacy of Meditation on the Medicine Buddha within the context of Tibetan Medicine and integrative possibilities with Biomedicine. Observation of Tibetan Healers at the Mentsekhang (Tibetan hospital) in Dharmasala, India. Focus was on the therapeutic impact of healing images, the imagination and meditation.

**Methodology**- participant observation; phenomenological; narrative

## WORK EXPERIENCE

### **Dr. Balabhai Nanavati Hospital, Vile Parle, Mumbai (January 2014 – Present)**
